SUMMARY

Site Reliability Engineer with 7+ years safeguarding mission-critical platforms within a leading global financial institution. Hands-on ownership across the full reliability lifecycle — observability, major incident management, SLO governance, capacity planning, and self-healing automation. Recognized for transforming reactive operations into proactive, engineering-driven reliability, trusted lead for high-severity incident response, engineer mentorship and aligning platform health with business outcomes.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) | Client: JP Morgan Chase - Home Lending

New Jersey

Sr. Analyst – Site Reliability & Application Support Consultant

Jan 2025 – Present

Mortgage Origination Platform Modernization:

- Spearhead modernization of enterprise-scale mortgage origination platforms, re-engineering legacy systems into scalable cloud-native applications serving 1M+ users and improving operational efficiency by 40%
- Design and deploy self-healing automation workflows in Python and shell, reducing manual intervention by 50% and cutting cloud infrastructure costs by 20% through intelligent resource allocation
- Mentor a team of 3+ junior engineers on automation, monitoring, and cloud adoption best practices

Enterprise Observability & Incident Management:

- Architect observability frameworks across Splunk, Dynatrace, and Grafana, increasing proactive issue detection by 30% and materially reducing alert fatigue across production support teams
- Lead high-severity incident response with RCA and blameless post-mortem culture, reducing MTTR by 35% while sustaining 99.9% application uptime across critical production systems
- Partner with cross-functional stakeholders and third-party vendors to align reliability targets (SLOs/SLAs) with business KPIs, enabling seamless integrations and high service resilience

Application Support Specialist

Sept 2019 – Dec 2024

24/7 Production Support & Reliability Engineering:

- Delivered 24/7 production support for mission-critical banking applications, implementing continuous monitoring across OS, application, and Kafka messaging layers to proactively identify bottlenecks and optimize performance
- Built custom alerting mechanisms that minimized false positives, and automated routine operations with Python, shell scripting, and Control-M to significantly reduce operational toil
- Served as first responder for production incidents, driving root-cause analysis and permanent-resolution tracking; acted as primary liaison across teams and vendors for coordinated issue resolution
- Championed SLO/SLA governance, capacity planning, and infrastructure optimization to align application performance with strategic business outcomes
- Supported CI/CD strategy by designing Jenkins deployment pipelines and streamlining releases with zero-downtime, blue-green rollout patterns

Reliance Industries Ltd – SAP BI Department

Mumbai, India

Data Analyst Intern

Jun 2018 – Aug 2018

- Developed an NLP sentiment analysis model (Keras/TensorFlow) achieving 80% classification accuracy; built a custom web scraper for real-time tweet extraction and applied Word2Vec + CNN-based OCR to digitize handwritten content

TECHNICAL SKILLS

Certifications: AWS Certified Cloud Practitioner, Certified Scrum Master (CSM), IBM Introduction to Data Science

Programming & Scripting: Python, SQL, Bash/Shell, PowerShell, HTML, JavaScript (Basic)

Observability & SRE Tooling: Splunk, Dynatrace, Grafana, Prometheus, Kafka, Control-M, ServiceNow, JIRA

Cloud & Infrastructure: AWS, Kubernetes, Docker, Terraform, Ansible, CI/CD (Jenkins, GitHub Actions)

Process & Analytics: ITIL, SAFe, Scrum/Kanban, Change & Release Management, Security Compliance Automation, Tableau, Excel Analytics, Data Warehousing

EDUCATION

Rutgers Business School

New Jersey

M.S. in Information Technology and Analytics | GPA: 3.93 | Beta Gamma Sigma Honor Society

May 2019

Harrisburg University of Science and Technology

Harrisburg, PA

M.S. in Project Management | GPA: 3.75

Jun 2024
